### ✓ IDIOMS :

- 1. Talking twenty to the dozen
- 2. At sixes and sevens
- 3. To sit on the fence
- 4. A stitch in time

## Passage :

Jean Wagner's most enduring contribution to the study of Afro-American poetry is his insistence that it be analyzed in a religious, as well as secular, frame of reference. The appropriateness of such an approach may seem self-evident for a tradition commencing with spirituals and owing its early forms, rhythms, vocabulary, and evangelical fervor to Wesleyan hymnals. But before Wagner a secular outlook that analyzed Black poetry solely within the context of political and social protest was dominant in the field.

It is Wagner who first demonstrated the essential fusion of racial and religious feeling in Afro-American poetry. The two, he argued, form a symbiotic union in which religious feelings are often applied to racial issues and racial problems are often projected onto a metaphysical plane. Wagner found this most eloquently illustrated in the Black spiritual, where the desire for freedom in this world and the hope for salvation in the next are inextricably intertwined.

#### 1. The primary purpose of the passage is to

- (A) contrast the theories of Jean Wagner with those of other contemporary critics
- (B) document the influence of Jean Wagner on the development of Afro-American poetry
- ©explain the relevance of Jean Wagner's work to the study of Afro-American religion

- In which of the following multithreading model the entire process will block if a thread makes a blocking system?
- If the initial value of counting semaphore is 15 and after that 5 wait() operations and 8 signal() operations are applied then what will be the current value of counting semaphore (s) variable?
- A. 18
- B. 10
- C. 3
- D. 8
- ✓ A copy constructor is invoked when:
- a. a function returns by value
- b. an argument is passed by value
- c. a function returns by reference
- d. none of the above
- How many page fault would occur for LRU replacement algo?
- Which of the following option typically improves performance if we increase the RAM of the computer?
- A. Virtual memory increases
- B. Virtual memory decreases
- C. Less no of page faults
- D. Less no of segmantation faults.
- A system contains five programs and each requires five tape units for its operation the minimum number of tape units required. Which of the system must have such that deadlock never arises?
- A. 21
- B. 22
- C. 23
- D. 24

- A. Cascading termination
- **B.** Zombie Process
- C. Orphans Process
- D. None
- OOPS concepts reflecting an IS A relationship between two classes is
- A. Dynamic binding
- B. Inheritance
- C. Composition
- D. Polymorphism
- ✓ Incorrect statement about hashing?
- A. A good hash function maps similar data items or records to the same hash values.
- B. A good hash function uniformly distributes data items across the entire set of possible hash values.
- C. A perfect hash function allows for constant time search, insertion, and deletion, into and from a hash table.
- D. When using an open addressing method of collision resolution, all data records reside in a single bucket array.
- ✓ What actually gets passed when you pass an array as an argument to the function?
- ✓ Octal (3232)4 to ()16 hex conversion
- A. EE
- B. EF
- C. FE
- D. DE
- ✓ Size of IPV6
- A. 48 bit
- D (1 hit

- C. 128 bit
- D. 256 bit
- ✓ Which of the Non-volatile storage device is fastest?
- A. SSD
- B. HHD
- C. Flash
- D. MMC
- ✓ What does 32 represents in 32 bit cpu?
- A. String
- B. Field
- C. Char
- D. Word size
- ✓ Lines required to connect 12 nodes in a mesh topology?
- A. 65
- B. 66
- C. 67
- D. 56
- ✓ Polymorphism can be achieved by ?
- A. Operator overloading
- B. Function overloading
- C. Virtual function
- D. All of the above
- ✓ Full form of IC?
- ✓ Which of this protocol is used to remote login in computer ???
- A. Telnet
- B. SSH
- C. FTP
- D Mass
